

TRIPLEPLAY

#STAYSAFE AT WORK

As more people return to the workplace, organizations are striving to create a safe and secure working environment. Effective, streamlined, digital media communications are at the heart of any 'back to work' strategy, allowing companies to quickly communicate relevant messages, engage employees and safeguard businesses.

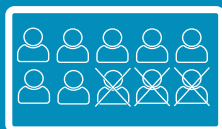

DIGITAL SIGNAGE

Digital displays in workspaces allow companies to communicate key messages to staff and visitors, including latest health and safety protocols and eye catching, dynamic content; keeping workers engaged and informed.

LIVE VIDEO DELIVERY

Easily stream live video to displays, including CEO addresses and company announcements, live news channels and internal camera feeds that allow staff to easily identify and avoid busy or congested areas.

OCCUPANCY MANAGEMENT

Use our real-time counting technology to monitor and display the numbers of people in offices, meeting rooms, canteens, gyms and communal spaces throughout the office to avoid congestion and maintain social distancing.

VIDEO EVERYWHERE

Share video and digital content to desktops and mobile devices to communicate with remote workers. Deliver announcements, training, health and safety and HR videos to staff anywhere in your organization and maintain engagement.
